NIST Recommended: 3128, 6128, 7128 Public Key Algorithm: RSA-2051 Note: The public key used for this encryption algorithm is derived from the NIST recommendation for the key size.. "The Baltimore Police Department does not have a gun database, as defined by the U.S. Justice Department, to track the numbers of people killed or even to understand the extent to which police misconduct leads to the killings of people like the Rev. Al Sharpton," the New York Times reported. "What the state is trying to do is document homicides that don't have police involvement or a single witness."..
